

Forms Design Using Zoho Creator

AIM

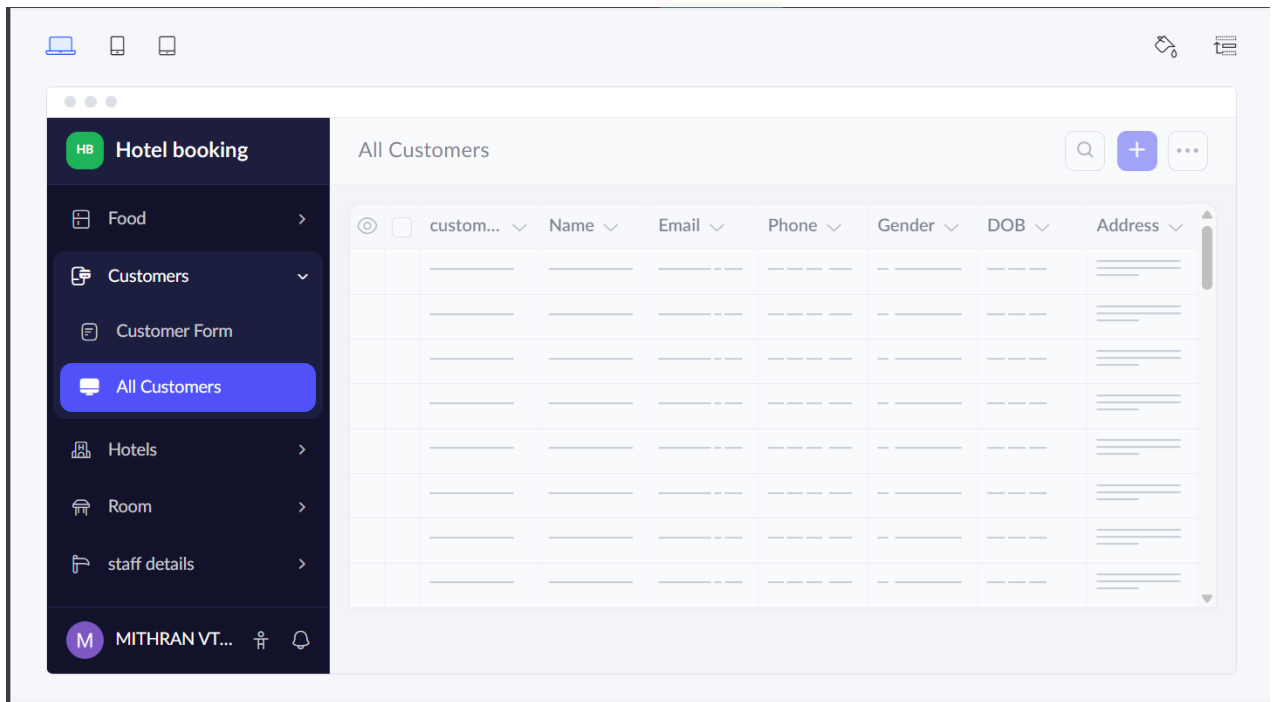

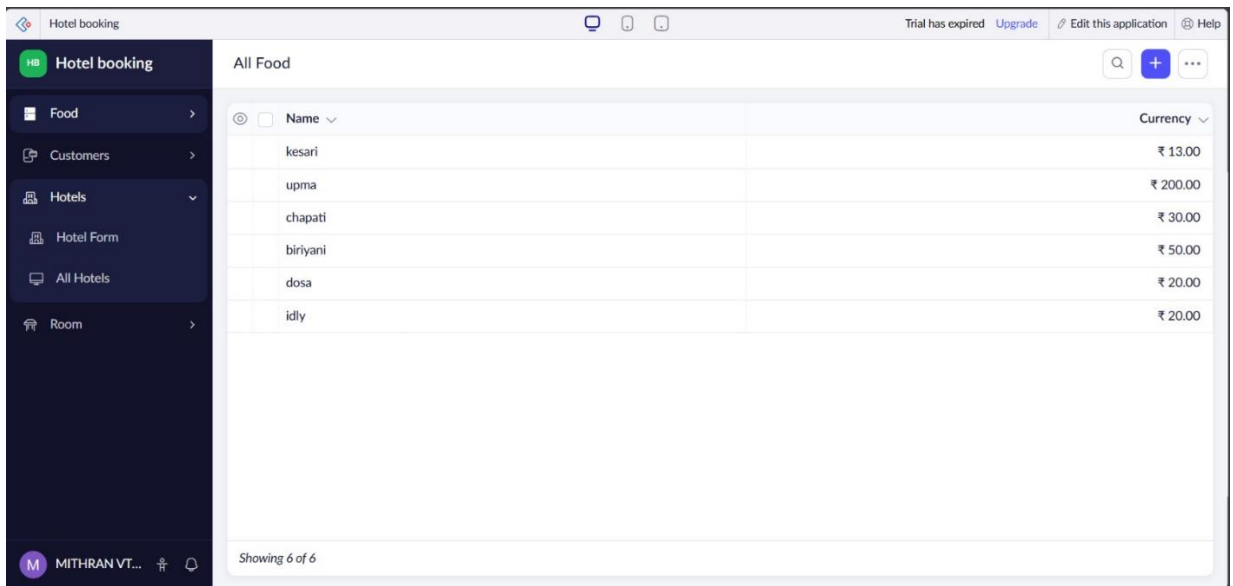

To design and develop the required **forms for a Hotel Booking application using Zoho Creator**, enabling efficient collection, storage, and management of customer, hotel, room, and booking information through a low-code development platform.

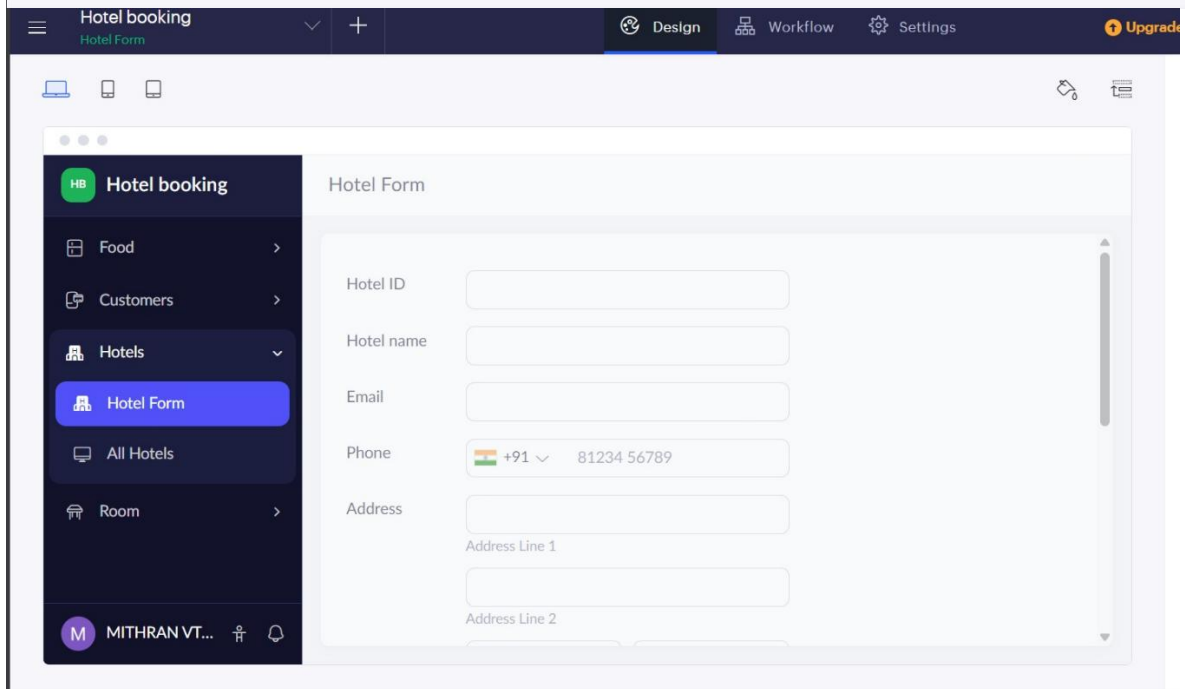

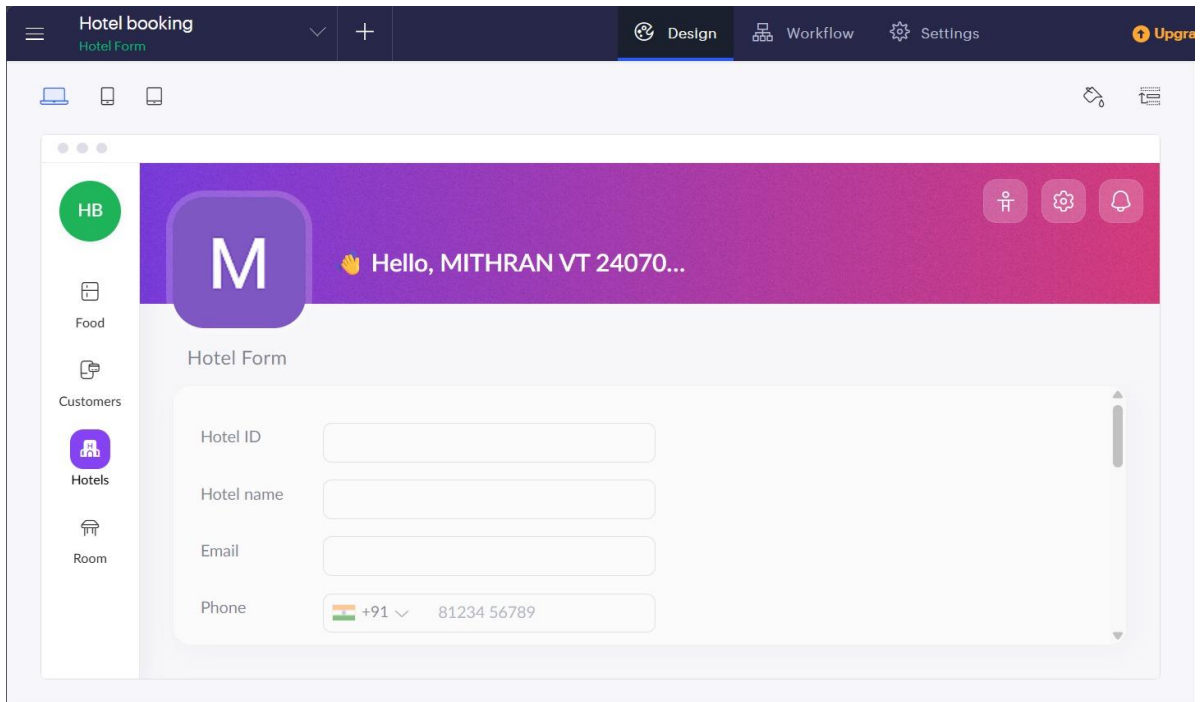

PROCEDURE

1. Create a **Hotel Booking** application in Zoho Creator.
2. Create the required forms: **Customers, Hotels, Room, and Booking**, and add the necessary fields to each form.
3. Use suitable field types such as **Text, Number, Date, Dropdown, Currency, and Lookup**.
4. Connect related forms using **Lookup fields** and enter sample data.
5. Save and test the forms to ensure the data is stored correctly.

OUTPUT

The screenshot displays the Zoho Creator form design interface for a form titled "Hotel booking staff details". On the left, a sidebar contains a grid of field type icons: Name (person icon), Email (envelope icon), Address (location pin icon), Phone (phone handset icon), Single Line (text input icon), Multi Line (text area icon), Number (numeric keypad icon), Date (calendar icon), Time (clock icon), Drop Down (dropdown arrow icon), and a section for widgets (eye and list icons). The main workspace on the right shows the form layout with the following fields: Name (text input), Email (text input), Phone (text input), Address (text input), Salary (currency input with a dollar sign icon), DOJ (date input with a calendar icon and a trash icon), and a Zoho logo at the bottom.

RESULT

The required Hotel Booking forms were successfully created using Zoho Creator. The forms allow efficient collection and management of customer, hotel, room, and booking details using appropriate fields and relationships.
